Gen With Dave back from foreign travels it was time to create another pale and hoppy beast of a beer... well, with all those lovely hops open and begging to be used, it was rude not to!

A dream-team of Galaxy, Simcoe and Citra was joined by super-sub Motueka and, for the first time in so long we can't remember when and can't be arsed to look up, we dispensed with the usual Herkules for bittering and, instead, went for the classic "Amsterdam skunk,, character of Columbus, one of our favourite hops and one we've neglected recently.

So, enjoy this hop monster of a beer, we will... !
