Yeast Safale S04

Gen Another week in the life of Steel City must mean another collaboration... life does seem to be one long round of them at the moment! Dave gets the blame for this one so expect, as per the usual script with us, something pale and very hoppy with - maybe - a whole load of Apollo, Herkules, Pacific Gem and Nelson Sauvin... business as usual, then, and we look forwards to using all David's hops for him for the purpose of stock rotation!

We know what hops are for...
